

GJ1000 is a mini sized GPS jammer with one detachable antenna. It's portable and light in weight; you can easily put it inside your handbag and bring it with you anywhere you go without being tracked. It can effectively block civil GPS L1 signals, with a jamming range for up to 10 meters depending on signal strength. Thanks to the low consumption of energy and high battery capacity, the rechargeable Li-Ion battery (included in packaging) lasts for up to 2 hours' nonstop after a full charge.

Accessories include an AC/DC adapter and a car charger. It's convenient for using it in a vehicle.

specificaties

Technische specificaties

Vermogen:	0,5 Watt
Maximale effectieve bereik:	10 meter
Antenne:	Extern,Omnidirectioneel
Voeding:	AC 110-240V, DC 5V
Gebruikstemperatuur:	-15°C tot +60°C
Luchtvochtigheid:	5%-80%
Storingssysteem	
GPS:	GPS L1 1575.42 MHz

Storingsfrequenties

1575.42 MHz:	GPS L1
--------------	--------

Uiterlijke specificaties

Afmetingen product:	97x45x19 mm
Gewicht:	111 gram
Afmetingen verpakking:	194x130x56 mm
Gewicht verpakking:	331 gram

Batterij

Type:	Lithium-Ion
Laadvermogen:	1100 mAh
Laadtijd:	3 uur
Operationele levensduur:	2 uur

Inhoud Verpakking

AC/DC-adapter:	1 stuks
Autolader:	1 stuks
